PERSONAL PROFILE

Frontend developer with 3+ years of commercial React and TypeScript experience, building accessible, well-tested web applications in a cross-functional product team. Writing Jest and Cypress tests alongside feature work as standard practice, and extending that focus through a full WCAG 2.2 AA accessibility audit on a personal project. Comfortable working across engineering and product: from writing user stories and facilitating Agile ceremonies to shipping and testing features. Committed to clean, maintainable code and scalable, accessible user experiences that work for everyone.

SKILLS

Technical: TypeScript, JavaScript, React, CSS/Sass, Node.js, Express, REST APIs, Git (GitHub/GitLab)

Testing & Accessibility: Jest, Cypress, WCAG 2.2 AA accessibility auditing

Tools & Platforms: Figma, Jira, Confluence

Agile & Product: Scrum (incl. acting Scrum Master), backlog refinement, user story writing, sprint planning and retrospectives

EXPERIENCE

Software Engineer, Scalable

April 2022 – August 2025

Developed and maintained front-end features for Acumen, a web application, using React and TypeScript in a small cross-functional product team. Wrote Jest unit tests and Cypress end-to-end tests alongside feature work as standard practice, improving code reliability and catching regressions early. Built UI with a consistent focus on performance and usability, while developing accessibility knowledge to WCAG standards. For a few months, additionally took on the Scrum Master role alongside frontend development, facilitating sprint ceremonies and coordinating team workflow. Partnered with the Head of Engineering, CEO, UX designer, QA testers, and developers to refine requirements, prioritise backlog items, and write user stories, acting as a bridge between leadership and engineering to align product goals with technical feasibility.

Analyst Programmer, Europcar

2005 – 2008

UI development, code review, and technical documentation in cross-functional teams of varying sizes.

PROJECTS

react-fundamentals — github.com/KerryCX/react-fundamentals

Custom useFetch<T> hook and an accessible DataDisplay component, with a test suite achieving 100% coverage.

case-management-service — github.com/KerryCX/case-management-service

Node.js, Express, and TypeScript REST API, with Jest test coverage of approximately 95–100% across 22 tests.

Jobs Done — jobsdone.kerryclements.com

Personal web application; completed a full WCAG 2.2 AA accessibility audit, now feeding into a Figma-based v2 redesign.

CERTIFICATIONS

BCS EXIN Foundation Certificate in Agile Scrum V4.0 — December 2025

EDUCATION

Bath Spa University

Oct 2021 – Jan 2022

Web Development Bootcamp

Practical course covering React, HTML, CSS, JavaScript, Git and working with APIs.

Open University

BSc (Hons) Open, 2:1 — 2006 (principally IT and Computing)

Diploma in Computing — 2003
